

STEEL LUX

PROTECTIVE POLISH FOR STEEL

PRODUCT DESCRIPTION

Cutting-polishing and protective compound that removes and dissolves rust and light oxidation, chalk, fading and minor scratches on steel surfaces, but also on aluminium, aluminium alloy, chrome, brass and metal parts in general. Its polymers-based formula assures an enduring protection against UV rays and weathering, preventing salt corrosion, stains and water spots. It leaves a rich radiant gloss. It is generally applied by hand with a microfiber cloth.

PHYSICAL PROPERTIES

Colour: White
 Physical form: Liquid-creamy
 Odour: Light and pleasant
 Density: 1,100 g/ml
 Flammability: Not flammable
 Type of surface: Steel, aluminium, brass, copper

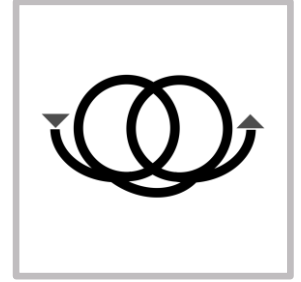

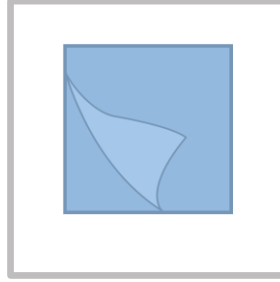

HOW TO USE

Shake before use, then apply a small quantity of compound on the polisher-pad or cloth and spread it with circular movements. Put light pressure at the beginning and if necessary increase it, paying attention not to scratch the surface. Let it dry for a while and eventually wipe the surface with a clean cloth.
