## POLISHING PROTECTIVE COMPOUND FOR STEEL

### PRODUCT DESCRIPTION

Water-based polishing rubbing compound that removes and dissolves light oxidations, dullness and minor scratches. It shines and leaves a long-lasting protection for a good maintenance and care of steel surfaces, but also of aluminium, aluminium alloy, chrome and simil-chrome. It is usually applied by hand but even by polisher at low RPM, according to the surface to treat. Let it dry for a while and remove it with a clean cloth.

### PHYSICAL PROPERTIES

**Colour:** White  
**Physical form:** Liquid-creamy  
**Odour:** Light and pleasant  
**Density:** 1,100 g/ml  
**Flammability:** Not flammable  
**Type of surface:** Steel, chrome, simil-chrome, aluminium, brass, copper

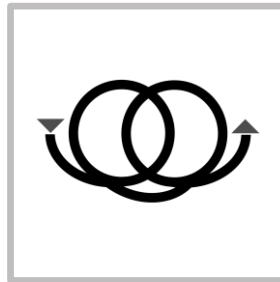

### HOW TO USE

Please apply a small quantity of compound on a **S18** pad and spread it with circular movements. Put light pressure at the beginning and if necessary, increase it, paying attention not to scratch the surface. Let it dry for a while and eventually wipe the surface with a clean Silky Microfiber Towel.
