

NAUTICLEAN

BOAT POLISHING CLEANER

CLEAN ■■■■■■ □ □
GLOSS ■■■■■■ ■ □

PRODUCT DESCRIPTION

This is a polishing cleaner, specially created for yacht and boat washing. It easily removes stains caused by natural elements and exhaust gas, insects, grease and droppings. Unlike many other boat cleaners in the market, **NAUTICLEAN** is a no-acid formula, which is not aggressive for the gelcoat and does not affect waxed hulls. Rather, through its innovative components it is able to shine the surface and to leave a lasting protection and an antistatic waterproof film, which prevent filth deposition. It may be used even with seawater, then rinse with clean water.

PHYSICAL PROPERTIES

Colour: whitish
Physical form: liquid
Odour: light and pleasant
Flammability: not flammable
Type of surface: gelcoat and painted boats, plastics, rubber, steel parts

HOW TO USE

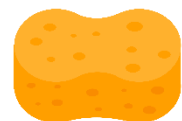

This self-drying product can be diluted from 2 to 4% in water. Please apply with either the sponge **SSO** or **ZZ3** or **ZZ5** brushes, combined to Extending handle **H220**. Please, insist where dirt is tougher, and wash away with clean water.

NAUTICLEAN contains: 5-15% Anionic surfactants; less than 5% Non-ionic surfactants
